

## InSite360 Initial Computer Set-up

**If the instructions below are not followed closely, it is likely that account activity will not be recorded. When exiting a lesson, a window will appear telling you that the information is being saved. Click 'Okay'. If that window does not appear then your progress will not be saved.**

1. Before trying to log into the training site at <http://www.ePathcampus.com/Paulson/login/index.html> please install the latest free versions of **Flashplayer, Shockwave, and Java.**

<http://get.adobe.com/flashplayer/>  
<http://get.adobe.com/shockwave/>  
[http://www.java.com/en/download/inc/windows\\_upgrade\\_ie.jsp](http://www.java.com/en/download/inc/windows_upgrade_ie.jsp)

2. **Check pop-up blockers** - A browser enabled with a pop-up blocker (or similar window blocking tool) may interfere with the launch of the Course Player. If this occurs, we recommend you set the blocking tool to "Always allow" for ePathcampus (e.g. sites ending in .ePathcampus.com) or for the site from which you access courseware. An additional technique is to use the CTRL or SHIFT key when selecting the blocking tool during course play and re-enabling it after completing your session.

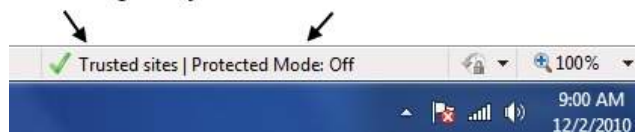

**If you have multiple toolbars open in your browser, e.g. Google and Yahoo, you must disable the pop-up blocker for each of them in the security settings.**

4. **ePathcampus.com** must be registered as an "Accepted" or "Trusted" site.

5. **If you will be using the training on a Windows Vista or newer computer**, you will need to change the Internet Security setting "Protection Mode" to 'off'.

Lower right of your IE browser should look like this.

6. **ePath Learning is browser neutral; however, for the best user experience, the recommended browser is Firefox.**
