This 3-hour interactive training course demonstrates and teaches the hands-on maintenance techniques that provide increased reliability and uptime for your molding machines. The importance of establishing a regular maintenance schedule, including tools and techniques, is reinforced. All machine systems, hydraulic, electrical, and mechanical, are covered in this course. Also highlighted is the importance of safety in the workplace and performing on-going safety system checks.

### Lesson Titles and Descriptions

1. **Molding Machine Maintenance Part 1:**
   - This lesson describes the importance of safety when performing routine maintenance on your injection molding machine, and includes demonstrations of safety practices such as lockout/tag out procedures. This lesson also contains recommended maintenance schedules and procedures for the injection unit screw and barrel, as well as corrective maintenance techniques for the clamping unit.

2. **Molding Machine Maintenance Part 2:**
   - This lesson continues to explore the maintenance requirements for the injection molding machine. The lesson also describes recommended maintenance procedures and schedules for the hydraulic and electrical systems for the injection molding machine.
More Effective Training: Get a 40% increase in knowledge retention and comprehension using interactive technology.

Scheduling Flexibility: Training is available to all shifts, 24 hours a day without affecting production.

Automatic Record Keeping: You can test and track employee progress automatically.

No Instructor Required: Fully interactive format provides either a self-paced, one-on-one or classroom learning environment.

Reduced Training Costs: Train on company time without loss of production. No dedicated instructor, no overtime and no overhead add up to large savings.

Increased Motivation: Immediate feedback and personal involvement are key factors in training effectiveness.

Complete Curriculum: Paulson’s fully interactive training program give your employee valuable skills for the mold setting and removal stages with full motion video, text, audio and 3-D graphic animation.
